

CV - David Dai - Latest-EN

David Dai

Senior Technical Project Manager | Cloud & E-commerce Delivery | Enterprise Integrations

Shanghai, China | Open to remote/hybrid

Email: DAVID.G.ADAM@GMAIL.COM | LinkedIn: [linkedin.com/in/david-adam](https://www.linkedin.com/in/david-adam)

Professional Summary

Technical Project Manager with 20+ years of cross-functional leadership experience delivering complex, high-impact programs across E-commerce, FinTech, cloud services, and enterprise software. Proven track record driving large-scale cloud migrations (AWS/GCP), API integrations, and AI-driven automation within regulated and international environments. Exceptional stakeholder management and release governance skills, with an innate ability to bridge the gap between business strategy and deep technical execution. Steered 30+ enterprise systems and programs to completion, consistently achieving metrics such as a 40% reduction in operational manual effort and 30% faster release cycles.

Core Skills

- **Project & Delivery Leadership:** Technical Project Management, Program Coordination, Agile/Scrum/Kanban Frameworks, Release Governance, Cross-Functional Alignment, Risk Mitigation, Roadmap Planning, Stakeholder Management.
- **Sector & Domain Expertise:** E-commerce Platforms, FinTech Delivery, Cross-Border Program Execution, Enterprise Architecture Integration, Compliance-Aware Execution.
- **Cloud & Technical Enablers:** AWS & GCP Delivery Coordination, CI/CD Pipeline Optimization, REST APIs, Microservices, SAP Backend Integration, WeChat Mini Programs, Docker, Systems Observability.
- **AI Delivery (Hands-on Literacy):** GenAI Project Delivery, RAG Architecture, FastAPI Prototyping, LangChain/CrewAI Frameworks, Vision AI Implementation.

Selected Impact

- **Operational Efficiency:** Automated manual transaction reviews using Vision AI, slashing workload by 40% while preserving strict compliance safeguards.
- **Release Optimization:** Overhauled deployment pipelines across AWS and WeChat platforms, boosting release frequency by 30% with zero critical production incidents.
- **Product Innovation:** Spearheaded the integration of GenAI into a live commercial e-commerce recommendation system, directing compliance and algorithmic filing alignment in mainland China.
- **Enterprise Integration:** Built robust middleware solutions connecting WeChat Mini Programs to SAP backend infrastructures for seamless data and marketing synchronization.

Professional Experience

Independent Technical Upskill & Professional Development | Jan 2026 – Present

**Technical Project Manager (Advanced Technical Training) | Shanghai, China (Remote/Hybrid)

- **AI Project Management Frameworks:** Upskilled in specialized AI delivery methodologies to successfully blend agile project governance with the iterative lifecycles of machine learning and GenAI products.
- **Hands-on AI & RAG Engineering:** Mastered enterprise-level LLM execution patterns through self-directed study, focusing on context management, Retrieval-Augmented Generation (RAG), and model fine-tuning.
- **Technical Prototyping:** Engineered functional, local sandboxed prototypes utilizing Python, FastAPI, LangChain, and CrewAI to deeply understand multi-agent orchestration and API workflows.
- **Cloud Infrastructure Refresh:** Updated and refreshed advanced AWS cloud architecture competencies, focusing on modern serverless scalability, DevOps pipelines, and cost optimization strategies.

Cognizant, Shanghai

Senior Associate — Technical Project Manager / Business Analyst / Scrum Master | May 2021 – Jan 2026

- **Cross-Functional Leadership:** Orchestrated global projects spanning FinTech, cloud services, and enterprise software, serving as the strategic technical liaison between business units and engineering teams.
- **Program Delivery:** Directed the deployment of a Global PCard Portal on GCP, embedding multi-layer security protocols and Vision AI automation that reduced manual workloads by 40%.
- **E-commerce & AI Integration:** Guided the cross-functional delivery of a GenAI recommendation engine for e-commerce search, managing complex cross-border architecture considerations and compliance requirements.
- **DevOps & Release Governance:** Transformed CI/CD architectures across AWS and WeChat platforms, increasing deployment frequency by 30% while maintaining a flawless zero-severity incident record.
- **Client Management:** Led WeChat Mini Program e-commerce delivery for a marquee high-tech global client, successfully synchronizing rapid localized release cycles with global AWS backend timelines.
- **Agile Facilitation:** Directed requirements workshops, backlog refinement, and cross-team planning sessions across product, engineering, and legal/compliance stakeholders.

PayPal, Shanghai

Technical Account Manager | May 2018 – Oct 2020

- **Technical Advisory:** Acted as the primary technical partner to top-tier enterprise accounts, analyzing integration quality, API performance, and transaction conversion rates.

- **Merchant Optimization:** Sustained merchant conversion metrics above 85% for high-value clients via proactive integration tuning and log-driven root-cause analysis.
- **Strategic Growth:** Identified platform upselling opportunities and translated merchant technical feedback into actionable product roadmap enhancements.

Defy Media, Shanghai

Senior Technical Producer | Aug 2017 – Mar 2018

- **Cloud Migration:** Managed a comprehensive AWS cloud migration strategy and oversaw digital media platform architecture updates.
- **AdTech Integration:** Led the development of a programmatic advertisement publishing portal integrating Google AdWords, DoubleClick, and AppNexus APIs.
- **Stakeholder Alignment:** Aligned business project goals with technical execution timelines for product releases and cross-platform rollouts.

EF Education First, Shanghai

Product Manager | Jul 2016 – Jun 2017

- **Project Rescue:** Revived and drove the successful delivery of a critical enterprise product that had previously stalled in development for three years.
- **Agile Governance:** Managed lifecycle roadmap prioritization, stakeholder requirements gathering, and iterative release schedules.

Isobar Commerce, Shanghai

Technical Project Manager | Dec 2012 – Jun 2016

- **E-commerce Portfolio Management:** Successfully delivered 30+ complex e-commerce projects for premier European and North American brands.
- **Process Engineering:** Pioneered Scrum and Kanban methodologies, establishing predictable 3-week release cadences, version control frameworks, and standardized deployment workflows.
- **Vendor & Enterprise Integration:** Governed end-to-end integration roadmaps for global accounts, including Decathlon, L'Oréal, 3M, WMF, and D'Addario.

Earlier Career

- **Ez System**, Beijing | *Technical Consultant* | Jun 2012 – Oct 2012
- **Bysoft China**, Guangzhou | *Technical Team Leader* | Apr 2008 – May 2012
- **Softwall OSM Software**, China | *Web Developer & E-commerce Operations Specialist* | Jun 2004 – Feb 2008

Education

Bachelor, Information Systems & Information Management

Hunan Business & Commercial University, Changsha | 1997 – 2001

Certifications

- **Project Management:** PMP (Project Management Professional) | PMI-ACP (Agile Certified Practitioner)
- **Agile Methodologies:** Certified Scrum Master (CSM) | Professional Scrum Product Owner I (PSPO I)
- **Cloud Architecture & DevOps:** AWS Certified Solutions Architect – Professional | AWS Certified DevOps Engineer – Professional
- **Cloud Specialties:** AWS Solutions Architect – Associate | AWS Developer – Associate | AWS SysOps Administrator – Associate
